

SFP-10GB-DW-C-E-AV-C

ADVA® Compatible TAA 10GBase-DWDM 100GHz SFP+ Transceiver (SMF, Tunable, 80km, LC, DOM, -20 to 85C)

Features:

- Small Form Factor Pluggable WDM Optical Transceiver from 191.3 to 196.3THz with 100GHz Spacing
- Self-Tuning Function Enables Automatic Link-Up
- 10G Electrical Interface (SFF-8418)
- Up to 80km Over SMF (ITU-T G.652)
- Loss of Signal (LOS) Function
- Operating Data Rate: 9.83 to 10.31Gbps
- LC Connector Interface
- Single Voltage 3.3V Power Supply
- Hot-Pluggable Electrical Interface
- Operating Temperature: -20 to 85 Celsius, -40C Cold Start
- RoHS Compliant and Lead-Free

Applications:

• 10GBase Ethernet

Product Description

This ADVA® SFP+ transceiver provides 10GBase-DWDM throughput up to 80km over single-mode fiber (SMF) using a tunable wavelength via an LC connector. It is guaranteed to be 100% compatible with the equivalent ADVA® transceiver. This easy to install, hot swappable transceiver has been programmed, uniquely serialized and data-traffic and application tested to ensure that it will initialize and perform identically. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

ProLabs' transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products."

Notes:

- 1. Rising edge of Tx_Disable to fall of output signal below 10% of normal.
- 2. Falling edge of Tx_Disable to rise of output signal above 90% of nominal. This only applies in normal operation, not during start-up or fault recovery.
- 3. From power on or hot plug, or Tx_Disable negated during power-up or Tx_Fault recovery, until cooled Power Level I part (or cooled Power Level II part during fault recovery) is fully operational. Also, from stop bit low-to-high SDA transition enabling Power Level II until cooled module is fully operational.
- 4. From occurrence of fault to assertion of Tx_Fault.
- 5. Time Tx_Disable must be held "high" to reset Tx_Fault.
- 6. From assertion until stable output.
- 7. From occurrence of loss of signal to assertion of Rx_LOS.
- 8. From occurrence of presence of signal to negation of Rx_LOS.
- 9. From writing of wavelength set command to completion of the wavelength tuning and output signal above 90%.

| 20 | VeeT | Transmitter Ground. | 1 | |

Notes:

- 1. The case makes electrical contact to the cage before any of the board edge contacts are made.
- 2. The module signal ground contacts, VeeR and VeeT, should be isolated from the module case.
- 3. SCL, SDA, and MOD_ABS should be pulled up with a $4.7k\Omega$ to $10k\Omega$ resistor on the host board. The pull-up voltage shall be VccT or VccR.
 - SCL is the clock line of the 2-wire serial interface for serial ID.
 - SDA is the data line of the 2-wire serial interface for serial ID.
 - MOD_ABS is grounded by the module to indicate that the module is present.
- 4. VccR and VccT are the receiver and transmitter power supplies. They are defined as 3.3V±5% at the SFP+ connector pin. Recommended host board power supply filtering is shown below.
- 5. TD- and TD+ are the differential transmitter inputs. They are AC coupled, differential lines with 100Ω differential termination inside the module.
- 6. RD- and RD+ are the differential receiver outputs. They are AC coupled, 100Ω differential lines which should be terminated with 100Ω (differential) at the host.

About ProLabs

Our experience comes as standard; for over 15 years ProLabs has delivered optical connectivity solutions that give our customers freedom and choice through our ability to provide seamless interoperability. At the heart of our company is the ability to provide state-of-the-art optical transport and connectivity solutions that are compatible with over 90 optical switching and transport platforms.

Complete Portfolio of Network Solutions

ProLabs is focused on innovations in optical transport and connectivity. The combination of our knowledge of optics and networking equipment enables ProLabs to be your single source for optical transport and connectivity solutions from 100Mb to 400G while providing innovative solutions that increase network efficiency. We provide the optical connectivity expertise that is compatible with and enhances your switching and transport equipment.

Trusted Partner

Customer service is our number one value. ProLabs has invested in people, labs and manufacturing capacity to ensure that you get immediate answers to your questions and compatible product when needed. With Engineering and Manufacturing offices in the U.K. and U.S. augmented by field offices throughout the U.S., U.K. and Asia, ProLabs is able to be our customers best advocate 24 hours a day.
