This Arista Networks® SFP28 transceiver provides 25GBase-DWDM throughput up to 15km over single-mode fiber (SMF) using a wavelength of Auto-Tunable via an LC connector. It is guaranteed to be 100% compatible with the equivalent Arista Networks® transceiver. This easy to install, hot swappable transceiver has been programmed, uniquely serialized and data-traffic and application tested to ensure that it will initialize and perform identically. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

ProLabs' transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products."

2. Not to exceed the sustained peak limit for more than 50µs - may exceed this limit for shorter durations.
3. DC Common-Mode Voltage is generated by the host. Specification includes the effects of ground offset voltage.

4. Meets BER specified in 109B.3.4.2.
