

## SFP-50G-SR-C

Juniper Networks® SFP-50G-SR Compatible TAA 50GBase-SR SFP56 Transceiver (MMF, 850nm, 100m, LC, DOM)

### Features:

- 850nm VCSEL Transmitter
- Power Dissipation of 1.5W
- Single 3.3V Power Supply
- Up to 100m over OM4
- Up to 70m over OM3
- Duplex LC Connector
- Hot-Pluggable
- Operating Temperature: 0 to 70 Celsius
- RoHS Compliant and Lead-Free

### Applications:

- 50GBase Ethernet

### Product Description

This Juniper Networks® SFP-50G-SR compatible SFP56 transceiver provides 50GBase-SR throughput up to 100m over multi-mode fiber (MMF) using a wavelength of 850nm via an LC connector. It can operate at temperatures between 0 and 70C. Our transceiver is built to meet or exceed OEM specifications and is guaranteed to be 100% compatible with Juniper Networks®. It has been programmed, uniquely serialized, and tested for data-traffic and application to ensure that it will initialize and perform identically. All of our transceivers comply with Multi-Source Agreement (MSA) standards to provide seamless network integration. Additional product features include Digital Optical Monitoring (DOM) support which allows access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

ProLabs' transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S.-made or designated country end products.")

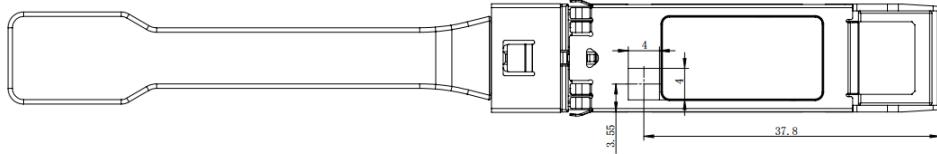

## Absolute Maximum Ratings

Parameter	Symbol	Min.	Typ.	Max.	Unit	Notes
Storage Temperature	Tstg	-40		85	°C	
Operating Case Temperature	Tc	0		70	°C	1
Relative Humidity	RH	5		85	%

**Notes:**

1. Power Supply Noise is defined as the peak-peak noise amplitude over the frequency range at the host supply side of the recommended power supply filter with the module and recommended filter in place. Voltage levels including peak-peak noise are limited to the recommended operating range of the associated power supply.
2. Equation (83E-5), Equation (83E-6), and Table120E-6 refer to 802.3-2018.
3. DC common-mode voltage is generated by the host. Specification includes the effects of ground offset voltage.
4. Module stressed input tolerance is measured using the procedure defined in 120E-8 IEEE802.3-2018.
5. Equation (83E-2) and Equation (83E-3) refer to 802.3-2018.

### Notes:

1. Average launch power (minimum) is informative and not the principal indicator of signal strength. A transmitter with launch power below this value cannot be compliant; however, a value above this does not ensure compliance.
2. Receiver sensitivity (OMA<sub>outer</sub>) = max. (-6.5, SECQ-7.9).

### Notes:

1. The module signal ground contacts, VeeR and VeeT, should be isolated from the module case.
2. This contact is an open collector/drain output contact and shall be pulled up on the host. Pull-ups can be connected to one of several power supplies; however, the host board design shall ensure that no module contact has voltage exceeding the module VccT/R+0.5V.
3. Tx\_Disable is an input contact with a resistor to the VccT inside the module.

## About ProLabs

Our experience comes as standard; for over 15 years ProLabs has delivered optical connectivity solutions that give our customers freedom and choice through our ability to provide seamless interoperability. At the heart of our company is the ability to provide state-of-the-art optical transport and connectivity solutions that are compatible with over 90 optical switching and transport platforms.

## Complete Portfolio of Network Solutions

ProLabs is focused on innovations in optical transport and connectivity. The combination of our knowledge of optics and networking equipment enables ProLabs to be your single source for optical transport and connectivity solutions from 100Mb to 400G while providing innovative solutions that increase network efficiency. We provide the optical connectivity expertise that is compatible with and enhances your switching and transport equipment.

## Trusted Partner

Customer service is our number one value. ProLabs has invested in people, labs and manufacturing capacity to ensure that you get immediate answers to your questions and compatible product when needed. With Engineering and Manufacturing offices in the U.K. and U.S. augmented by field offices throughout the U.S., U.K. and Asia, ProLabs is able to be our customers best advocate 24 hours a day.
